RUB Wheel of Academic Law: Academic Dishonesty

Section H2 of the Royal University of Bhutan's *Wheel of Academic Law* provides the following definition of academic dishonesty:

Academic dishonesty may be defined as any attempt by a student to gain an unfair advantage in any assessment. It may be demonstrated by one of the following:

1. **Collusion:** the representation of a piece of unauthorized group work as the work of a single candidate.
2. **Commissioning:** submitting an assignment done by another person as the student's own work.
3. **Duplication**: the inclusion in coursework of material identical or substantially similar to material which has already been submitted for any other assessment within the University.
4. **False declaration**: making a false declaration in order to receive special consideration by an Examination Board or to obtain extensions to deadlines or exemption from work.
5. **Falsification of data**: presentation of data in laboratory reports, projects, etc., based on work purported to have been carried out by the student, which has been invented, altered or copied by the student.
6. **Plagiarism**: the unacknowledged use of another's work as if it were one's own.

Examples are:

- verbatim copying of another's work without acknowledgement.
- paraphrasing of another's work by simply changing a few words or altering the order of presentation, without acknowledgement.
- ideas or intellectual data in any form presented as one's own without acknowledging the source(s).
- making significant use of unattributed digital images such as graphs, tables, photographs, etc. taken from test books, articles, films, plays, handouts, the internet, or any other source, whether published or unpublished.
- submission of a piece of work which has previously been assessed for a different award or module or at a different institution as if it were new work.
- use of any material without prior permission of copyright from the appropriate authority or owner of the materials used".

Continuous Practical Assignment: Personal Profile/Resume Website

Introduction

This semester-long assignment is to design and develop a personal profile website, applying the UI/UX design principles and web development skills you'll learn throughout the course. The project is divided into three phases, each building upon the previous one, culminating in a fully responsive website that showcases your abilities as a designer and developer.

*This continuous assignment represents **40%** of the module's final total grade. The total grade of this assignment will be out of 40 marks.*

Overall Objective

Create a personal profile website that effectively presents your skills, experiences, and personality to potential employers or clients. This website will serve as both a learning platform for you and a portfolio piece for your future endeavors.

Phase I: Website Design (12.5%)

Objective: Design a personal profile/resume website using Figma.

Tasks:

- Conceptualize your personal brand and how you want to present yourself online.
- Develop a cohesive color scheme and typography that reflects your personal brand.
- Incorporate creative elements that make your design stand out while maintaining usability.
- Ensure your design adheres to fundamental design principles (contrast, repetition, alignment, proximity).
- Organize your Figma file neatly with proper labeling and grouping.

Submission:

Figma link to your project (ensure viewing permissions are set correctly)
Brief explanation of your design choices and personal branding strategy
Deadline: **6th October**

Grading Criteria

This assignment represents 12.5% of the module's final total grade. The total grade of this assignment will be out of 12.5 marks, distributed as follows:

Creativity and aesthetics of the design	-7
Adherence to design principles	-3.5
Completeness and organization	-2

<u>Phase II: Desktop Website Development (12.5%)</u>

Objective: Develop a static website for desktop browsers based on your Phase I design.

Tasks:

- Set up a GitHub repository for your project.
- Translate your Figma design into HTML, CSS.
- Ensure your website is functional and matches your design closely.
- Implement basic interactivity and animations where appropriate.
- Optimize images and assets for web performance.
- Ensure your code is well-structured, commented, and follows best practices.
- Test your website across different desktop browsers for compatibility.

Submission:

GitHub repository link containing your source code
Live website link (hosted on GitHub Pages)
Deadline: **27th October**

Grading Criteria

This assignment represents 12.5% of the module's final total grade. The total grade of this assignment will be out of 12.5 marks, distributed as follows:

Understanding and application	-2.5
Code Quality	-4
Technical skills	-6

Phase III: Responsive Website Development (15%)

Objective: Improve your website from Phase II to be fully responsive and mobile-friendly.

Tasks:

- Analyze your existing design and plan necessary modifications for smaller screens.
- Implement responsive design using CSS media queries and flexible layouts.
- Optimize the user experience for mobile devices (touch-friendly navigation, readable text sizes, etc.).
- Ensure all functionalities work correctly across various screen sizes and devices.
- Implement advanced features like lazy loading for images or a dark mode toggle.
- Refactor your code to improve performance and maintainability.
- Conduct thorough testing on various devices and browsers.

Submission:

Updated GitHub repository link
Updated live website link (GitHub Pages)
Final Deadline: **18th November**

Grading Criteria

This assignment represents 15% of the module's final total grade. The total grade of this assignment will be out of 15 marks, distributed as follows:

Understanding and application	-5

Code Quality	-4
Structure and semantics	-6

General Guidelines:

- Regularly commit your progress to GitHub throughout all phases.
- Seek feedback from peers and instructors during development.
- Pay attention to accessibility considerations in both design and development.
- Ensure your content is professional and free of grammatical errors.
- Refer to the breakdown provided in the assignment description for each phase.
- Remember, this project is an opportunity to create a valuable addition to your portfolio.
